

COMP61342 Stereo Vision Amusement

Terence Morley, Department of Computer Science, The University of Manchester

Below is a stereo image pair of a mechanical device.

- Zoom this document so that the two images are large and fully visible on your screen.
- Make yourself go cross-eyed while staring at the screen and within a few moments you should be able to see the appearance of the device in 3D

(The images need to be placed Right-Left and not Left-Right because it is easier to cross your eyes than to stare off into the distance while looking at something in front of you.)
