## Exercise Question for Week 5 – Web Security, SSL and WLAN Security

## E3.1. Contrast the two security packages, SSL and WPA, in terms of the attributes given in the table below.

| Comparison<br>Attributes     | HTTPs/SSL | WLAN WPA2 |  |
|------------------------------|-----------|-----------|--|
| Entity AutheN                |           |           |  |
|                              |           |           |  |
| Key<br>Establishment         |           |           |  |
| Data Integrity               |           |           |  |
| Data<br>Confidentiality      |           |           |  |
| Anti-replay                  |           |           |  |
| Application<br>Accessibility |           |           |  |
| Software<br>Required         |           |           |  |
| Scalability                  |           |           |  |
| Weaknesses                   |           |           |  |
